ECOSYSTEM SERVICES

List Ecosystem Services

- **Water and Food Security** - supplies freshwater to nearby cities and municipalities as well as producing highland crops.
- **Biodiversity Conservation** - home to numerous endemic and threatened species.
- **Climate Regulation and Disaster Mitigation** - the dense forest acts as a carbon sink as well as reducing the risk of flooding and landslide.
- **Ecotourism** - activities include mountaineering, trekking, birdwatching, camping, and swimming in waterfalls and cold springs.
- **Scientific Research** - provides a hands-on learning environment for conservation practices, climate change studies, and watershed management for academic constitutions and NGOs.
- **Cultural and Spiritual Significance** - rituals, festivals, and traditional practices continue to honor the spiritual connection between people and the mountain.

SITE-SPECIFIC CHALLENGES, ISSUES AND CONCERNS

SITE-SPECIFIC CHALLENGES, ISSUES AND CONCERNS (TOP 5)	REMARKS ACTIONS TAKEN, PROPOSED STRATEGIES, INNOVATIONS OR IMPROVEMENTS
1. Continuous volcanic activity (Natural factor)	- Ongoing volcanic unrest affects regular operations, limits field activities, and delays project implementation. - Coordinated with PHIVOLCs and OCD for continuous monitoring. - Temporary relocated staff and operations to MKNP Satellite Office, Bacolod City. - Adjusted work plans and adopted flexible scheduling and off-site data processing
2. MKNP plantilla positions	- Limited number of permanent staff hinders full implementation of targets and monitoring activities. - Proposed creation and filling of key plantilla positions through DENR and PAMB endorsement. - Continued utilization of COs personnel to support operations.
3. Lack of logistics for operational purposes	- Insufficient transport, equipment, and field supplies constrain mobility and monitoring efficiency. - Requested additional logistics and operational budget through DENR PENRO. - Implemented resource sharing with partner LGU and agencies. - Maximized available materials and local support.
4. Law enforcement protocols and deeper understanding	- Inconsistent enforcement procedures and limited awareness among deputized enforcers and local communities. - Conducted orientation and refresher training on ENR laws. - Proposed harmonized enforcement protocol under PAMB.
5. Illegal activities (hunting, poaching, timber cutting, charcoal making, extraction of minor forest products, beeswax collection, resin extractions)	- Persistent despite patrol operations. - Linked to livelihood dependence of upland residents. - Intensified patrolling and community surveillance. - Conducted CEPA activities and livelihood alternative programs. - Strengthened collaboration with local enforcement units and stakeholders.
