SITE-SPECIFIC CHALLENGES, ISSUES AND CONCERNS

SITE-SPECIFIC CHALLENGES, ISSUES AND CONCERNS (TOP 5)	REMARKS ACTIONS TAKEN, PROPOSED STRATEGIES, INNOVATIONS OR IMPROVEMENTS
1 No security of budget and job position for the Protected Area Management Office technical and administrative staff.	Always lobby top management decision makers to allocate funds for the plantilla position for MBRNP. For the meantime, collaborate with the concerned LGUs for funding of hiring Bantay Lasang.
2 Logistics support for vehicles like 4-wheel drive and motorcycles in going to remote mountainous areas. Also, equipment for the Biodiversity Management System, like a quality camera with a high zoom range.	Utilize the assigned vehicle, which is more than 10 years old with high maintenance costs already. Coordinate with LGUs if they have available vehicles. It is recommended to allocate funds for the purchase of vehicles and equipment.
3 Human intrusions and disturbance within the protected area; insurgency still occurs in the area, which hampers the implementation of activities on time.	Coordinate with the Philippine Army assigned to the area. A budget for hazard fees on the PA personnel should be allocated.
4 Limited opportunities for employment and livelihood to IP communities adjacent to the PA.	Organized them to become recipients of ENGP projects. Assist in drafting proposals for their Biodiversity Friendly Enterprise for funding from both government and non-government financing institutions. The government should increase funding for BDFEs.
5 No budget allocation for the capacity development through training and benchmarking of PAMB members and PAMO staff.	Submitted a request for funding to the RO and the concerned Provincial LGU, but to no avail. Innovation includes collaboration with other offices that have a budget for CAPDev to join in their activities. It is recommended that funds for CAPDev be allocated annually.
