## SITE-SPECIFIC CHALLENGES, ISSUES AND CONCERNS

| SITE-SPECIFIC CHALLENGES, ISSUES AND CONCERNS (TOP 5) | REMARKS<br>ACTIONS TAKEN, PROPOSED STRATEGIES, INNOVATIONS OR IMPROVEMENTS |
|---|---|
| 1. The proposed wind energy development by Gemini Wind Energy Corp (GWEC) overlaps with CPHPL boundaries | 1. Conduct a comprehensive Environmental Impact Assessment (EIA) with biodiversity safeguards.<br>2. Align project with the CPHPL Management Plan and zoning regulations<br>3. Establish a joint monitoring team to oversee ecological impacts<br>4. Require biodiversity offset programs if impacts are unavoidable<br>5. Advocate for a buffer zone policy to prevent infrastructure encroachment into sensitive areas<br>6. Promote adaptive project design to minimize footprint and avoid critical habitats<br>7. Monitor compliance through third-party environmental audits and regular reporting to the Protected Area Management Board (PAMB)<br>8. Integrate climate resilience and disaster risk reduction into project design to protect both infrastructure and ecosystems<br>9. Require cumulative impact assessments to evaluate long-term effects on biodiversity and watershed health |
| 2. Local stakeholders in Calbayog have raised concerns about the GWEC wind energy project's potential impact on ecosystems. | 1. Strengthen community and stakeholder engagement to build trust and ensure inclusive decision-making<br>2. Include local benefit-sharing mechanisms to ensure affected communities gain from the project<br>3. Develop a conflict resolution mechanism to address disputes between developers and conservation stakeholders<br>4. Ensure transparent stakeholder consultations, including local communities.<br>5. Conduct multi-level stakeholder consultations, including barangay leaders, and local NGOs |
| 3. Limited Funding and Manpower: Only one regular employee currently manages the protected area, which poses significant operational challenges. Limited funding further compounds these. | 1. Secure additional funding from the DENR Central Office through the Biodiversity Management Bureau (BMB)<br>2. Create Plantilla positions specifically assigned to CPHPL<br>3. Implement capacity-building programs to train community volunteers and deputized rangers<br>4. Develop a Public-Private Partnership (PPP) model for sustainable financing and infrastructure support<br>5. Utilize internship and volunteer programs from local universities to support fieldwork and monitoring |
